PROFESSIONAL SUMMARY

CS Engineering graduate (2026) with 10+ production features shipped across MERN Stack internships and a CNN-based AI system achieving 90%+ accuracy. Building Salesforce platform expertise in Apex, SOQL, and SOSL alongside hands-on experience with REST APIs, Docker, AWS, and Agile development. Driven to architect scalable, high-performance cloud products that customers love.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, Apex (Salesforce)

Salesforce Platform: Salesforce Apex, SOQL (Salesforce Object Query Language), SOSL (Salesforce Object Search Language), DML Operations, Collections (List, Set, Map), OOP in Apex, Classes & Objects, Control Flow, Multi-tenant Architecture

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, PostgreSQL, SQL, Salesforce Data Model

AI/ML: TensorFlow, Deep Learning, Computer Vision, CNN, U-Net

Cloud & DevOps: AWS (Cloud Practitioner Certified), Docker, Git, GitHub, Salesforce Cloud Platform

Testing & QA: Unit Testing, Functional Testing, Test Automation, Code Coverage, Test Strategy Design

Core CS: Data Structures & Algorithms, OOP, Scalable System Design, Exception Handling

Practices: Agile/Scrum, Code Reviews, Telemetry & Metrics, CI/CD Pipelines, Governor Limits Awareness

WORK EXPERIENCE

Full Stack Software Engineering Intern — *SuprMentr Technologies Pvt Ltd*, Bengaluru, India Feb 2026 – May 2026

- Architected, designed, implemented, and tested 10+ full-stack features using React.js, Node.js, and MongoDB, improving application functionality and reducing development turnaround time in an Agile environment.
- Designed and integrated REST APIs enabling seamless frontend-backend communication, supporting scalable application growth and improving system reliability.
- Developed test strategies and wrote unit/functional tests to drive up code coverage and automation metrics across the codebase.
- Contributed to code reviews and UI improvements, increasing maintainability and delivering a more intuitive, high-quality user experience.
- Collaborated closely with product managers and UX experts to build new features that customers would love and adopt, while keeping the platform stable and scalable.

Web Developer Intern — *Intrainz*, Bengaluru, India

Nov 2023 – Jan 2024

- Built and deployed responsive, scalable web applications using React.js and JavaScript, ensuring cross-device compatibility and improved usability.
- Managed collaborative development workflows using Git and GitHub, improving code quality, team productivity, and adherence to coding standards.
- Worked in Agile teams to deliver project milestones on schedule while maintaining documentation standards and contributing to test coverage.

PROJECTS

AI-Driven Bone Cancer Detection System | Python, TensorFlow, Flask, React.js, Docker

2025

- Architected and implemented an AI-powered Bone Cancer Detection System using CNN and U-Net deep learning architectures, achieving 90%+ classification accuracy on nearly 4,000 medical images.
- Developed a Flask REST API and React.js dashboard enabling real-time medical image upload, segmentation, and diagnosis prediction at scale.
- Dockerized the complete AI pipeline, ensuring consistent and reliable deployment across development and production environments — applying telemetry and metrics to validate system performance.

- Designed automated test suites to validate model accuracy and API reliability, ensuring high-quality, production-ready delivery.

Full Stack E-Commerce Platform (FreshCart) | MongoDB, Express.js, React.js, Node.js (MERN), Razorpay 2026

- Engineered a full-stack MERN e-commerce platform supporting product management, subscriptions, cart operations, and order tracking — designed for scalability and high user adoption.
- Integrated Razorpay payment gateway to enable secure online transactions and streamlined checkout workflows, improving reliability and user trust.
- Implemented JWT authentication and role-based authorization, securing user access and protecting application resources in a cloud-ready architecture.
- Wrote unit and functional tests to validate core business logic, increasing code coverage and reducing regression risk.

EDUCATION

B.E. in Computer Science & Engineering - K.S. Institute of Technology, Bengaluru, Karnataka Dec 2022 – May 2026

GPA: 8.38 / 10.0 (No Backlogs)

Science (PCMB) - VishwaChetana PU College, Davangere, Karnataka

Jul 2020 – Apr 2022

Score: 94.33%

CERTIFICATIONS & KEY ACHIEVEMENTS

- AWS Cloud Practitioner Essentials Certification -hands-on experience with cloud-based deployment and scalable infrastructure.
- Built AI-powered Bone Cancer Detection System achieving 90%+ prediction accuracy on large medical imaging datasets.
- Delivered 10+ production-ready features during Full Stack internship using React.js, Node.js, and MongoDB in an Agile environment.
- Maintained 8.38 CGPA in B.E. Computer Science & Engineering with zero backlogs.
