PROFESSIONAL SUMMARY

CSE graduate with a strong foundation in Java, React, MySQL, and OOP. Experienced in REST APIs and full-stack development with hands-on experience in React.js, Node.js, and backend development. Passionate about building scalable software solutions, learning modern technologies, and contributing to high-quality engineering teams.

TECHNICAL SKILLS

Languages: Java

Frontend: React.js, JavaScript, HTML5, CSS3

Backend: Node.js, Express.js, Flask, REST APIs

Database: MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Render, Netlify

Tools: GitHub, Git, Debugging

Core CS: Data Structures & Algorithms, OOP, Software Development Life Cycle (SDLC)

WORK EXPERIENCE

Full Stack Web Development Intern - SuprMentr Technologies Pvt Ltd. *Feb 2026 – May 2026*
Bengaluru, India

- Delivered **10+ full-stack features** using React.js, Node.js, and MongoDB, improving application functionality and reducing development turnaround time in an Agile environment.
- Designed and integrated **REST APIs** enabling seamless frontend-backend communication and supporting scalable application growth.
- Contributed to code reviews and UI improvements, increasing maintainability and delivering a more intuitive user experience.

Web Developer Intern - Intrainz *Nov 2023 - Jan 2024*
Bengaluru, India

- Built and deployed responsive web applications using React.js and JavaScript, ensuring cross-device compatibility and improved usability.
- Managed collaborative development workflows using Git and GitHub, improving code quality and team productivity.
- Worked in Agile teams to deliver project milestones on schedule while maintaining coding and documentation standards.

PROJECTS

Full Stack E-Commerce Platform (FreshCart) | GitHub | Live Demo *2026*
Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN), Razorpay

- Customers need a convenient platform to browse groceries, manage carts, make secure payments, and track their orders online.
- Built a MERN-based e-commerce platform with product management, subscriptions, cart and order operations, Razorpay for payments, and JWT-based authentication with role-based access.
- MERN provides a scalable full-stack architecture, Razorpay enables secure online payments, and JWT + role-based authorization protects user data and application resources.

AI-Driven Bone Cancer Detection System | GitHub *2025*
Tech Stack: Python, TensorFlow, Flask, React.js, Docker, AI/ML

- Detecting and classifying bone cancer from X-ray images manually can be difficult and time-consuming.
- Used U-Net for segmenting affected regions and CNN for feature extraction and cancer classification, with Flask + React.js for the web application.
- CNN is effective for medical image classification, U-Net is suitable for precise image segmentation, and Docker ensures consistent deployment.

EDUCATION

B.E. in Computer Science & Engineering - K.S. Institute of Technology *Dec 2022 - May 2026*
Bengaluru, Karnataka | GPA: 8.42 / 10.0

KEY ACHIEVEMENTS

- Built an AI-powered Bone Cancer Detection System achieving 90%+ prediction accuracy on medical imaging datasets.
- Developed 10+ production features during Full Stack internship using React.js, Node.js, and MongoDB.
- Earned AWS Cloud Practitioner Essentials Certification.
